

Brand Guidelines

Trust in every deal.

Navy Trust · v1.0 · 2026

Everything it takes to build Sada, in one place.

The single reference for the identity – for designers, developers and partners. If anything conflicts with rule 08, the rule wins.

01

Fundamentals

Who we are

Values

Personality & voice

Sada is one trusted marketplace between brands and creators.

We replace the chaos of email, WhatsApp and payment apps with one clear path: agree, pay into escrow, draft, publish, release. Every step happens in-app, on the record.

SY

Syria-first

Local cities, e-wallets and instant cash-out.

AR

Arabic-first

Designed right-to-left first, English second.

ESC

Escrow-backed

Money is held until content is live and proven.

FOR CREATORS

Show your value. Get paid, safely.

Linked socials, automatic stats, AI portfolio, campaign applications and a wallet to withdraw.

FOR BRANDS

Pay once. Track every result.

Brief builder, smart matching by city and niche, creator comparison, draft review and ROI analytics.

THE PROMISE

Trust in every deal.

Automatic contracts and invoices, escrow, refunds and mutual ratings.

Four values. Every design decision traces back to one.

01

Trust

Money sits in escrow until content is live. We never promise what the system can't guarantee.

Navy · identity

02

Clarity

Every deal, draft and payment shows its state. One clear next step per screen.

Teal · interaction

03

Fairness

Transparent prices, mutual ratings, disputes resolved on in-app evidence.

Mint · money

04

Local excellence

We celebrate the best creators in every city: badges, rankings and premium tiers.

Mustard · premium

We speak like a trusted financial partner, not an ad.

We are	We are not
Confident	Arrogant
Clear	Technical or vague
Warm	Childish or hyped
Professional	Cold and corporate
Local	Slangy where it matters

- **Arabic first:** simple, friendly Modern Standard Arabic, short sentences.
- **Money is precise:** always amount + currency + state.
- **No emoji** in money or contract messages.

✓ Like this

Your \$500 is safe in escrow and moves to your wallet as soon as the reel is live.

✗ Not like this

Payment pending!!! DM us on WhatsApp 🔥

✓ Like this

The brand asked for a change. Review the notes and upload a new version.

✗ Not like this

Error 422: deal state validation failed.

02

Visual identity

Logo & meaning

Color

Typography

Shape & space

An echo that comes back with value.

“Sada” (صدى) means echo. A brand speaks, a creator makes it resonate, and every campaign comes back as a measurable result. The mark draws that moment: two sets of waves meeting around one point.

CONCEPT

C — Concentric Echo

Arcs fade from faint (inner) to strong (outer): the echo grows as it travels. The -20° tilt adds forward momentum.

● Left arcs

Brand & ad reach — the brand’s message going out to the audience.

● Right arcs

Creator resonance & financial trust — the creator echoes it back in their own voice, safely.

● Centre dot

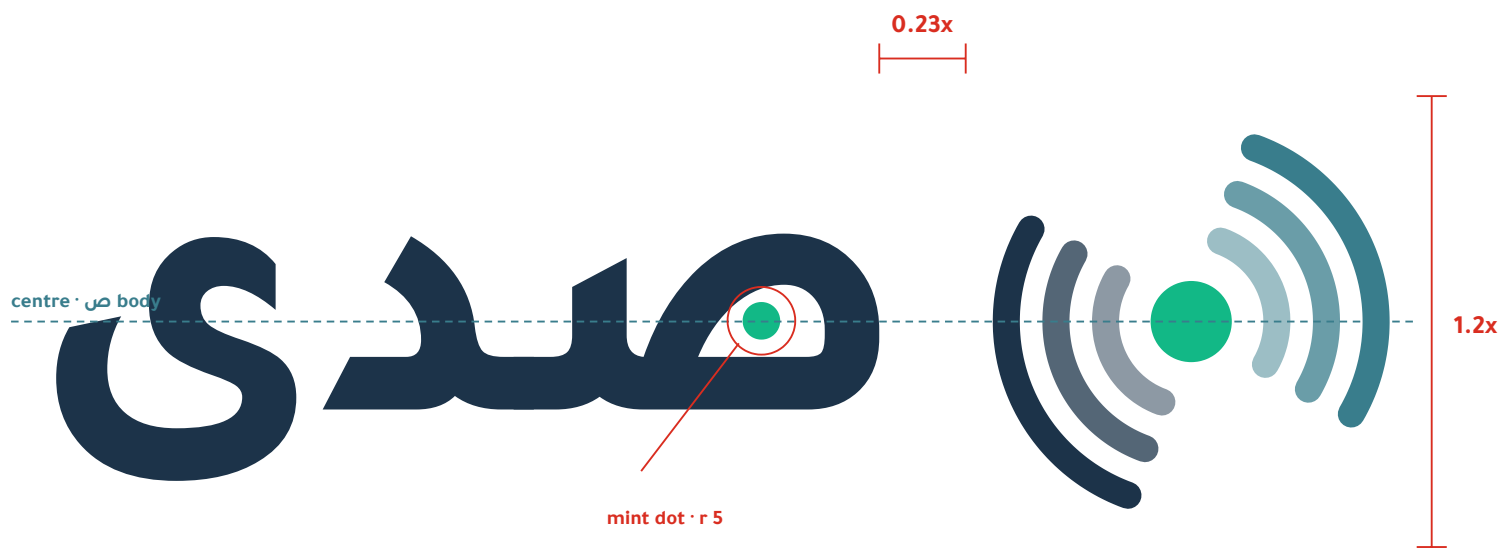

Escrow & money — the deal at the heart, held until both sides deliver.

Precise geometry – generated, never drawn.

Every logo file comes out of one script; no file is ever edited by hand.

Grid	viewBox 0 0 100 100
Radii	19 · 30 · 41
Arc span	±50° / side
Tilt	–20° arcs only, dot stays
Stroke	6 · round caps
Dot	r 9 · #12B886
Fade A	50% · 75% · 100% (inner → outer)
Source	python3 scripts/logo/gen.py

Wordmark «صدي»

Tajawal ExtraBold converted to outlines (no font dependency). Navy on light, #F5F7F9 on navy.

The mint dot

Sits inside the loop of ص – the same escrow dot as the symbol: money at the heart of the name.

Lockup

Symbol on the reading-start side (right). Height 1.2x font size, gap 0.23x, centred on the ص body. Never mirrored for English.

Wordmark · dark

wordmark-en-dark.svg

Lockup: symbol 1.2x cap height, gap 0.23x, centred on the cap height. Never combine “صدى” and “Sada” in one lockup.

The symbol simplifies as it shrinks.

Size	Tier	Arcs	Stroke / dot
≥ 48px	symbol-lg	3 · 50/75/100%	6 / 9
24-32px	symbol-md	2 · 75/100%	8 / 10
16px	symbol-sm	1 · 100%	11 / 12

- **Clear space:** $\frac{1}{4}$ of the symbol height ($\frac{1}{4} H$) on every side.
- **Minimum lockup:** 24px tall on screen / 8mm in print.
- **Minimum symbol:** 16px, using symbol-sm.

Same colours as the dark lockup. Always.

Full-bleed navy #1C3349, left arcs #F5F7F9, right arcs teal #397D8C, mint dot. The OS applies the corner mask.

iOS

Android

60

40

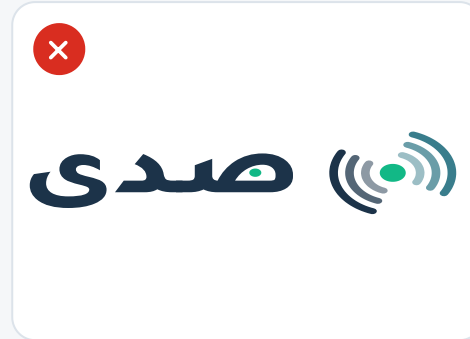

29

- Three arcs at every size; stays inside Android's circular safe zone (55% of the canvas).
- Never flattened to all-white; no shadows or gradients added.
- Launch splash: the symbol alone at 112pt on navy, no wordmark – it matches the icon and works in every language.

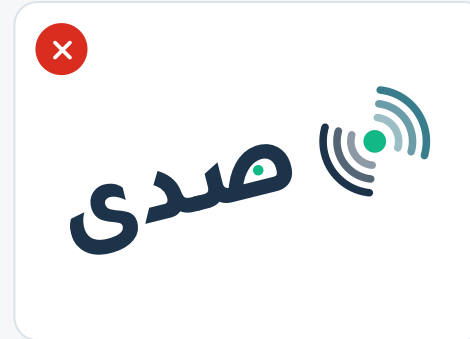

Never alter the logo.

Don't recolour.

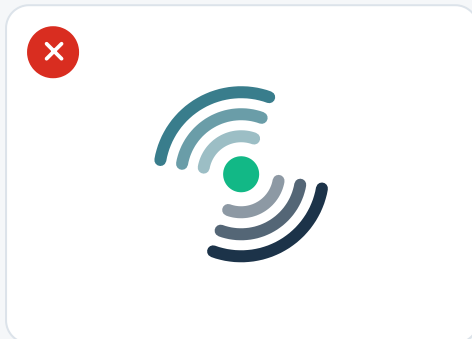

Don't stretch or squash.

Don't rotate the lockup.

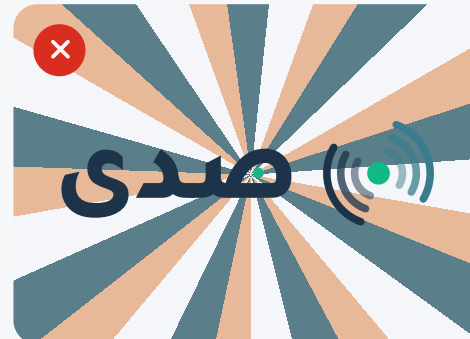

No shadows or effects.

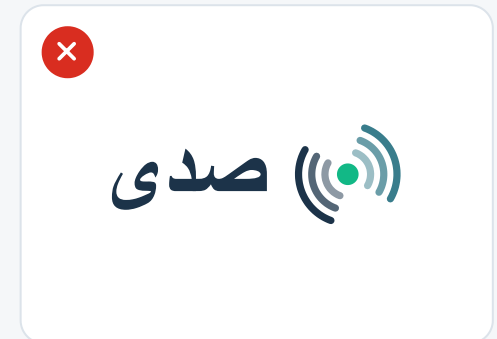

Don't mirror or re-tilt the symbol.

No low-contrast backgrounds.

No busy backgrounds – use a solid plate.

Don't retype the wordmark.

Four colours. One job each.

صدي

Aa

Tajawal is one Arabic + Latin family: geometric, clear at small sizes.
Replaces Almarai.

\$1,250.00

Money, prices and timers use
tabular figures.

Digits: Western digits (1,250) in both Arabic and English – never Arabic-Indic (١.٢٥٠).

Light 300	ثقة Trust 123	light
Regular 400	ثقة Trust 123	regular
Medium 500	ثقة Trust 123	medium
Bold 700	ثقة Trust 123	bold
ExtraBold 800	ثقة Trust 123	extraBold

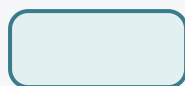

Tajawal has no SemiBold – weight 600 renders as Bold. Components use
<Text variant> only.

- **Reference frame:** 375×812; sizes scale via `fontScale`.
- **Arabic:** line height × 1.12 automatically in RTL.
- **Hierarchy:** by size and weight, not colour.
- **Body text** never below 14px; 12px is for captions only.
- **Supports** system text scaling, capped by `maxFontSizeMultiplier`.

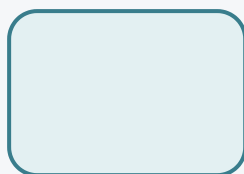

Soft and modern, still structured.

05

Usage rules

Do

Don't

Checklist

05.1 Do's & don'ts

✓ **One primary**
Everything else secondary.

✗ **Two primaries, mint button**
Mint is not a button colour.

✓ **Success ≠ money**
Status uses success; the amount uses mint.

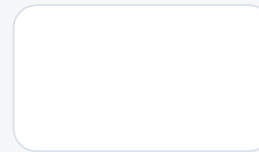

✗ **Mixed roles**
Teal money, or a mint status.

✓ **Mustard as fill**
with #8A6A24 text.

Warning: offer expires

✗ **Mustard text / warning**
2:1 contrast; warnings are orange.

✓ **Radius 8-12**
Flat with a hairline border.

✗ **Bubbles & gradients**
24 radius, heavy shadow, new hues.

✓ **Colour + text**
Readable without colour.

✗ **Colour alone**
Fails colour-blind users.

✓ **Everything in-app**
On-record evidence for disputes.

✗ **Off-platform**
No WhatsApp for deal actions.

Before any screen ships.

01

Colour

- Every colour comes from tokens.
- Mint = money, mustard = premium.
- Never branch on `isDark`.
- AA contrast in both modes.

02

Layout

- Logical props only: `start/end`.
- Spacing from the scale only.
- Radius md/lg; shadows for floating only.
- Touch targets $\geq 44\text{pt}$.

03

Copy

- i18n keys in both AR and EN.
- `<Text variant>` only.
- Money via `Intl`, with currency.
- Errors: cause + fix.

04

Imagery

- Real local creators and products.
- Large, no colour filters.
- Drafts shown at original quality.

05

Money & trust

- Status and balances from the server only.
- Disable pay while in flight.
- Show the escrow line next to every payment.

06

Logo

- From `src/assets/images/logo` only.
- The right tier for the size.
- $\frac{1}{4}$ H clear space.
